DNA SPRING VERVE

Pesavento Awards 2018 Limited Edition

The Pesavento Awards 2018 gala evening marks the occasion of the international premiere of the latest addition to Pesavento's DNA Spring collection, a creative interpretation in a limited edition.

The DNA Verve wire selected for the new creation is designed with a special memory effect that lends extraordinary flexibility to the jewel, making it always return to its original form.

In the photo: DNA SPRING VERVE. A supple choker of minimal elegance in ruthenium silver. Limited edition also in pink silver and rhodium.
