EVOLUTION, A/W PREVIEW 2023

Beyond the boundaries of jewelry

Pesavento welcomes a new era by revisiting the most iconic collections: a creative evolution that embraces fashion trends and opens the world of jewelry to new communication languages.

What does artificial intelligence envision for the Pesavento collections?

Between tangible and intangible, present and future, innovation and *savoir faire*, new worlds appear on the horizon, and beauty shines in an even more precious light.

Stay tuned!

POLVERE DI SOGNI, COLORS OF THE WORLD

It's an ode to joy, the latest from Pesavento! A riot of colors to enhance the Polvere di Sogni collection, inviting you to enjoy the *experience* of traveling round the world in a kaleidoscope of shades.

The new colors combine with silver to create a dance of light, with infinite reflections in these eight amazing shades: the endless azure of the Caribbean and the deep blue of Santorini, the lush green of the Amazon and the velvety green of the Black Forest, the subtle yellow of Nardò, and the golden hues of the Sahara, the cherry-blossom pink of Tokyo, and the intense shades of the palaces of Jaipur. An enticing palette of colors, to collect and combine.

It's delightful to wear them quite freely, combined and superimposed in a lively play of color, or in stylish tone-on-tone coordination.

In the pictures: the new colors of Polvere di Sogni add an alluring sparkle to the iconic jewelry and best-of Pesavento range, illuminating the rhodium silver with multiple shades from around the world.

DNA SILK

Elegant alchemy of sensuality and future

From silk, it borrows the lustrous softness, a caressing hand and feminine sinuosity. From the future, the ethereal and innovative lightness that triggers boundless imagination. This is SILK, the latest evolution of the DNA silver collection.

The new Dna Silk strand brings new energy to the flat chain with new spiral waves that give life to trails of rhodium, pink, ruthenium light. It features standard necklaces or designs with strands of decreasing lengths, bracelets with magnetic or carabiner clasp, single or multi strand.

In the picture: The new DNA SILK bracelets in pink, rhodium and ruthenium silver.
